Jelzia
Data Engineering as a Service

Prospectus v1.0
November 2026
Geneva, Switzerland

Your data stack, run for you. One flat monthly subscription.

Pipelines, warehouse, monitoring and incident response, operated by a Geneva engineering team at a price you know before the month starts. Your data stays yours, we run the platform.

WHAT WE RUN

- Pipelines from your tools into a clean warehouse
- Data products (dashboards, alerts, exports), kept running
- Quality monitoring and incident response

HOW WE WORK

- A named engineer who knows your stack
- A shared board; one item in progress at a time
- Well-scoped work ships in days

YOUR DATA STAYS YOURS

- Stored where you choose: Switzerland, Europe or elsewhere
- On our platform or in your own cloud account, same price
- On exit: export, delete or transfer, on your timeline

HOW AN ENGAGEMENT STARTS

01
Scoping week 0

A scoping meeting on your data landscape, in person or remote. Within 48 hours, a written proposal: scope, deliverables, flat monthly rate.

02
MVP first weeks

A thin slice end to end: one source, one product, real numbers in front of you. Proves the pipeline before anything scales.

03
Run month to month

The subscription runs month to month. Scope grows or shrinks at month end and the rate follows; the board shows what ships next.

> **Say you have 70 TB to manage.** The MVP runs on a few GB, enough to prove the model, the checks and the delivery. We scale once that works.

THE SUBSCRIPTION

From CHF 2,500

per month, flat price. Some consumption (warehouse, connectors) can be additional, billed at cost.

Month to month: pause or cancel anytime, no exit fee, no annual prepay.

HOW WE BILL: UNITS OF SCOPE

Source
A system or file feed kept connected and ingested on schedule.

Transformation
Your numbers defined once, reconciled, kept correct.

Product
A dashboard, an alert set or a scored table, kept running and monitored.

CHF 2,500 covers 1 source, 1 transformation and 1 product. Each unit you add raises the rate by less than the one before; custom units count for more.

EXAMPLES

Revenue dashboard

`3 sources` `1 transformation` `1 product`

Your billing, shop and CRM feed one place. Every morning, one revenue figure that finance and sales both trust.

CHF 2,800 / month

Margin by store and channel

`1 source` `2 custom sources` `1 transformation` `1 product`

Cash register sales, webshop orders and ERP costs, matched up every day. You see what each store and channel actually earns.

CHF 3,400 / month

Weekly management pack

`3 custom sources` `1 transformation` `1 product`

ERP figures, sales workbooks and shop-floor files, pulled together automatically. The Monday pack arrives without anyone building it.

CHF 3,600 / month
On your own servers: CHF 4,500
